

seca marina 817

The high art of
the low pedestal.

product sheet [**seca marina 817**

- Stable construction.
For users up to 180 kilograms.
- Roughened glass surface.
For maximum slip resistance.
- Two additional steel elements.
For stable pedestal attachment.
- Step-off function. For weighing
without switching on scales.
- Large LCD figures.
For easy reading.
- More than 165 years of experience. For maximum precision.
- From the global market
leader for medical weighing
and measuring.

seca marina 817:

This is how shape is always kept.

Take a close look: a stable glass platform for people weighing up to 180 kilograms. An elevated display. Simply nothing is too heavy for this scale. And it always keeps its elegant shape.

This is how high flat can be.

This should be seen: a low, elegant pedestal, a slim, flat scale. Flat and yet not flat: a high level of safety provided by 10-millimetre-thick safety glass plate, a display which also serves as a handle and 29-millimetre LCD figures. All this makes the seca marina 817 precisely the right scale for people with high requirements: for their health, their body and their scale.

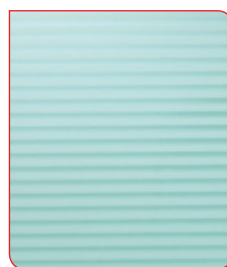

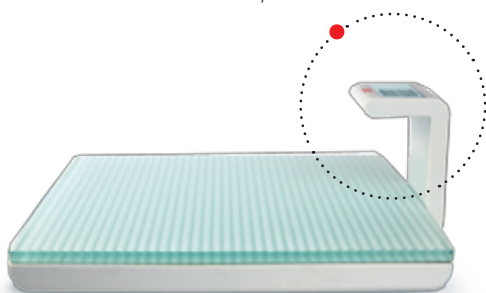

This is how tough gentle can be.

The extremely flat base is not only uniquely elegant and robust, but is also made from a particularly robust ABS plastic (acrylonitrile-butadiene-styrene) which withstands impacts, shocks and all commercially available cleaning and disinfecting products. But users' feet do not have to be shock-resistant because the edges of base and weighing platform are gently rounded.

This is how safe glass can be.

It is possible to slip off glass, particularly with wet feet. Not so with the seca marina 817: thanks to special furnace varnishing which puts a groove structure right across the glass plate. This guarantees a safe foothold and maximum protection against slipping. You see, a scale from seca is a safe bet that goes beyond precision during weighing.

Big display on a low pedestal.

Non-slip groove structure on the glass plate.

seca marina 817

Technical data

- Capacity: 180 kg / 400 lbs / 28 sts
- Division: 100 g / 0.2 lbs
- Dimensions scale (WxHxD): 350 x 135 x 350 mm
- Weight: 3.5 kg
- Functions: Step-off, Auto-HOLD, automatic switch-off
- Parts to be delivered: 4 AAA batteries, 4 extension feet for carpets
