

Digital floor scale with individual BW/BF measurement seca sensa 804

new

- ▲ Precise measurement of body composition . storage of individual data . elegant design . high stability . easy to read results . energy-saving automatic switch-off

Health check made easy

One's weight is not the only important criterion when evaluating one's state of health, fitness and nutritional condition. The body composition also plays a role. That is why the seca sensa 804 also determines the water (BW – body water) and fat (BF – body fat) content of the body. A function which is becoming increasingly more important in view of growing health awareness. The BW/BF measurement is in ever more demand especially in private homes.

Precise measurement of body composition

The digital scale seca sensa 804 measures the individual body composition of the user simply, quickly and precisely. Chrome-plated, highly conductive electrodes guarantee exact results. The positioning of the electrodes on the platform corresponds with the natural position of the feet so one does not have to pay particular attention to how one stands.

Storage of individual data

The analysis of the water and fat content of the body takes personal data such as sex, age, height and bodily fitness into account. Four internal memory cells are available for entering the data. The seca sensa 804 then automatically recognises the user on the basis of his/her weight (range: ± 1 kg) and reverts to the stored data at every BW/BF measurement.

Elegant design

The simple, rounded weighing platform gives the seca sensa 804 an elegant appearance which is also underlined by the chrome-plated electrodes. The key pad is located above the display element. This

also adds to the pleasing appearance and at the same time prevents the keys becoming dirty or data being reprogrammed due to inadvertently touching the keys during the measuring process.

High stability, easy to read results

The surface of the plastic used for the seca sensa 804 is extremely hard so that knocks and scratches do not impair the attractive appearance. Large LCD figures make the results easily legible.

Energy-saving automatic switch-off

Due to the energy-saving automatic switch-off function and low power consumption, the seca sensa 804 is durable and low-maintenance. But should the battery have to be changed this is indicated in good time.

Technical data

seca sensa 804

Capacity: 150 kg / 330 lbs/ 23.8 sts

Graduation: 100 g / 0.2 lbs

Dimensions, scale (WxHxD): 315 x 44 x 300 mm

Digit height: 20 mm

Weight: 1.3 kg

Power supply: batteries

Functions: auto-HOLD, BW/BF measurement, tip-on automatic switch-on, kg/lbs/sts switch-over, automatic switch-off
